## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The prior art documents submitted by applicant in the Information Disclosure Statement filed on 7/28/2004 have all been considered and made of record (note the attached copy of form PTO – 1449).

### ***Allowable Subject Matter***

2. Claims 1- 4 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1 , for example which include a method of adjusting the optical thickness of an optical component made from a material transparent to light to be used, comprising: manufacturing a lens and adding one of layers of material which is the same as the material of lens and the index of refraction is close to the index of refraction of the material of the lens and at least one of vapor deposition or vapor growth to a surface of the lens , so that optical thickness is

increased and the one of the layers having a thick ness determined by a difference between a thickness of the manufacturing lens and a target thickness of the lens.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest prior art

Kitagawa, Yuji (JP 401172569A) discloses, a process for controlling thickness of vapor deposition film.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
